

Silent Running's new distributor program will be introduced at this year's SEMA show.

East Haven, CT (August 13, 2015) - Insulation manufacturers, Silent Running (www.silentcoating.com) has finalized their new distribution program to provide distributors with an interactive display stand, literature, and marketing support. The company plans to increase their distribution network within the next year to allow for easier shipments to customers. Silent Running offers three different products for various distributors: SR 1000-marine, SR 500-industrial, and SR CAR-automotive. The new distributor page allows customers to easily get in contact with their local distributors and offers an information tab for potential distributors to find out more about the opportunity.

Silent Running plans to initiate their new distribution program November 3rd at this year's SEMA show in Las Vegas where there will be sign-up sheets and information packets for potential distributors. Visit their booth, #34323 in the Upper South Hall or www.sr-car.com for more information.

About Silent Running:

Silent Running is a high performance coating used to dampen vibration and reduce unwanted noise. Even better, it is manufactured and distributed in the USA! There are many kits to choose from in order to accurately help with projects. For more information, please visit www.sr-car.com or call 877-436-6542.
